The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 50-52 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 50-52 recite the limitation "carboxylic acid comonomer" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 44-46 and 53-54 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang et al US Patent 5,631,328.

Wang et al discloses a method of making a coat having the step of adding a copolymer of ethylene with carboxylic acid to a solvent system to form a composition (see col. 2, lines 52-60); applying the composition to an implantable medical device (see col. 17, lines 38-42) and allowing the solvent system to evaporate (see col. 8, lines 62-65).

Regarding claim 45, see col. 3, lines 43 and 54.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 47, 48 and 50-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang et al US Patent 5,631,328 in view of Chabrecek et al US Patent 6,087,412.

Wang et al discloses the invention substantially as claimed. However, Wang et al does not disclose a solvent system made of toluene.

Chabrecek et al discloses a solvent made of toluene for the purpose of having an inert solvent (see col. 9, lines 65-67).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the solvent of the Wang et al reference with the toluene solvent of the Chabrecek et al reference in order to have an inert solvent.

Regarding claims 50-52, disclose the claimed invention except for having a carboxylic acid comonomer between 5 to 50 percent by weight. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the percentage by weight of the copolymer, since it has been held that finding an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F. 2d 272, 205 USPQ 215 (CCPA 1980).

Claim 49 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wang et al US Patent 5,631,328 in view of Kliment et al US Patent 4,729,914.

Wang et al discloses the invention substantially as claimed. However, Wang et al does not disclose a chlorinated solvent.

Kliment et al teaches a copolymer having a solvent and the solvent is chlorinate for the purpose of obtaining an organic liquid which is relatively easy to evaporate at room or slightly elevated temperatures (see col. 4, lines 4-14).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Wang et al reference with the Kliment reference in order to obtain an organic liquid which is relatively easy to evaporate at room or slightly elevated temperatures.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J. Stewart whose telephone number is 571-272-4760. The examiner can normally be reached on Monday-Friday 7:00AM-5:30PM(1 Friday B-week off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 571-272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
